

Notes:

## Sawvel Accessories

Neapolitan Adapter, Telescopic Fill Head, Air Burper and By-Pass Valves

### Neapolitan Adapter

This adapter allows three flavors of ice cream to be fed into one ice cream line. An insert is available for running two flavors of ice cream into one line.

600 gph to 1600 gph

### Sawvel Model #116 Air Burper

This model removes excess air trapped under the lid giving a full appearance to each pail. Designed for 4, 5 and 6 quart pails.

### Sawvel Telescopic Fill Head

Available with 2" or 2.5" bevel seat threaded fittings.

Used for filling 5 quart through 3 gallon containers.

### By-Pass Valves

1.5" to 4" Pipe size

Air operated valves for by-passing ice cream or syrup back to the mix tank, syrup hopper or a separate container.

Notes:

**Telescopic Fill Head Instructions**

1. Mount this unit above a large table. Use elbows so it will swing left to right.
2. Place the fill head into the bottom of the first container. The ice cream will push the TFH up as the container is being filled.
3. Then swing the fill head over to the next container and repeat.
